फरवरी/February 14, 2022

Dear Shri.Bhosle,

Today, 14th February 2022, PSLV C52 successfully placed three satellites into their exact orbits, marking the first launch vehicle mission success in 2022.

This success is made possible through the tireless and dedicated contribution of the external industry partners, who had worked hand-in-hand with our team for the realization of the systems, strictly complying with the quality standards stipulated by team ISRO.

At this juncture I would like to express my sincere gratitude to you and your team for the excellent support provided for the realization of Avionics packages for the launch vehicle even during the pandemic situation.

Looking forward towards your continued support and more fruitful and successful association

With warm regards.

(सुधीर जॉर्ज वर्गीस/ Sudhir George Verghis)
(उप निदेशक, वीएसएससी (ईएसई) /Dy. Director, VSSC (ESAE))
